Waterblocs®

A natural biological treatment for Ponds, Lakes, Dams & Aquariums

Reduce Sludge & Cloudy Water Rapid Growth of Beneficial Bacteria
Prevent Oxygen Depletion Absorbs Ammonia & Excessive Nutrients
Suitable for all Fish, Plants & Organisms Use in Salt or Fresh Water
Biodegradable with ZEOLITE

10 x Mini-blocs

For Water Sizes
50L - 1,000L 0.4m² -4m²

200g Net
Contains 10 x 20g blocs

DIRECTIONS FOR USE: Place the recommended dose of **Waterblocs®** underwater in an area with gentle or no water flow every three (3) months. Depending on water temperatures, **Waterblocs®** will take several weeks to develop large populations of beneficial bacteria within the porous mineral substrate and around the ZEOLITE particles. Colonies of naturally occurring beneficial bacteria produce enzymes that consume organic waste, ammonia and unwanted nutrients that cause cloudy water that can deplete oxygen levels essential for aquatic life in a well balanced ecosystem. Best results are obtained when water temperature is 15°C and above, pH 7.0 with aeration to 3ppm dissolved oxygen.

RECOMMENDED DOSE: Increase dosages for stagnant waters, aquatic systems containing large amounts of organic waste & in problem areas.

Use one(1) x 20g Mini-bloc per 50L to 100L of water or per 0.4m² of water surface area.

PONDS & LAKES – Apply **Waterblocs®** to the bottom of the pond or float near the surface.

FOUNTAINS – Place in the water reservoir or in an area of low water turbulence.

AQUARIUMS – Totally or partially bury **Waterblocs®** in aquarium gravel.

TO TREAT SLUDGE – Place **Waterblocs®** directly in the sludge layer to stimulate the growth of anaerobic bacteria that devours organic waste. They will slowly biodegrade leaving only a natural ZEOLITE residue beneficial to soils and harmless to the marine environment.

PRECAUTION: After immersion in water and colonies of beneficial bacteria have developed, the product should only be handled with rubber gloves and use a protective mask.

SAFETY DIRECTIONS: Do not consume. Keep out of reach of children. Wash hands after use.

FIRST AID: If poisoning occurs contact a doctor or Poisons Information Centre on Tel; Australia 131126; New Zealand 03 474 7000.
